

# Let's Peak

Spring is an important period for growers and buyers, and therefore for us. We are doing everything we can together to ensure this season is another success.

## Predictable & reliable logistics

- Responding flexibly to demand fluctuations
- Sufficient transport packaging available throughout the entire peak period
- Start and end times on our website and the RFH news

## Choice of delivery time slots

### For products where we perform order picking:

- Later delivery in time slot [11:00 a.m. - 3:00 p.m.](#) (with a discount on the first day of the week)
- Deliver faster or earlier than the regular process with other [Select Delivery](#) time slots (for a fee)

## What we always do

- Recruit logistics employees
- Office colleagues help support during peak times
- [Non- and early auction days](#)
- Guarantee the availability of sufficient logistic supplies

## Peak 2026 forecast

- Similar to 2025
- Regular peak
- The biggest challenge remains: securing enough staff
